Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
M.Des.	Indian Institute of Technology, Jodhpur	8.03	2024–Present
B.Tech. (CSE)	Mar Athanasius College of Engineering, Kothamangalam	8.14	2017–2021
Senior Secondary	Kerala DHSE	96.67%	2017
Secondary	CBSE Board	10.0	2015

Experience

- **Imersive.IO** *Jun. 2025 – Aug. 2025*
  Product Development Intern Chennai, India (Remote)
  - Designed and developed a stylist-facing data collection interface enabling structured input of size recommendations across clothing permutations, with export functionality to generate training data for an AI sizing model.
  - Implemented a real-time face-based height estimation component using Google MediaPipe, translating a published facial-proportion algorithm into a working web prototype.

- **IQVIA** *Oct. 2021 – Jan. 2024*
  Associate Software Developer Kochi, India (Hybrid)
  - Key full-stack developer on Supply Integrity Management System (SiMS), an enterprise pharma supply chain platform; delivered implementations for Amgen (Wave 2), Boehringer Ingelheim (Wave 1), Sandoz (Wave 1), and Takeda (Wave 2 and 3); received the IQVIA IMPACT Ovation Award for technical excellence and deployment ownership.
  - Took ownership of UI/UX decisions on a product with no dedicated designer, applying Gestalt principles to button grouping and layout to reduce learning curve on a complex multi-module enterprise application.
  - Proposed a persistent approval/rejection status column in place of toast notifications for pharmaceutical tracking; solution was adopted because 3-second toasts caused users to lose track of rejected items.
  - Participated in client requirements sessions; translated usability concerns (column search, frozen headers, approval visibility) into Angular front-end implementations with ASP.NET API layers and SQL stored procedures.
  - Owned IIS deployments and Azure DevOps pipelines across development, UAT, and production environments.

  Intern *Apr. 2021 – Oct. 2021*
  - Completed onboarding learning tasks in Angular, ASP.NET, and SQL under mentorship; transitioned to a full-time role upon graduation.

Projects

- **Aam**
  VR experience refined via pilot study, 3 iterations, and Nielsen heuristic eval.
  - **UX Methods:** Pilot user study, iterative design (3 versions), Nielsen heuristic evaluation (3 evaluators, severity ratings), colour-blind accessibility, Likert-scale usability questionnaire
  - **Tools:** Unreal Engine 5, Figma

- **Digimal**
  AR virtual pet for Meta Quest; full UX framework, presence-first validation.
  - **UX Methods:** User persona, information architecture, task flow, state-based interaction model (health and affection variables), user testing
  - User testing showed a life-sized AR dog triggered physical touch attempts and empathy with no interactivity, validating presence-first XR design.
  - **Tools:** Unity, C#, Figma, Procreate

- **ARuler Redesign**
  AR app usability study: 5 users, 3 tasks, 11 issues, 9 redesigns proposed.
  - **UX Methods:** Structured usability study, task analysis, pain point documentation, evidence-based redesign proposals
  - Key proposals: undo button, corrected iconography, touch-point clipping microinteraction, redesigned label placement, separated photo/video controls
  - **Tools:** Figma

- **Who VR**
  Experimental 360-degree VR narrative film; montage theory applied to VR.
  - **Role:** Co-director, writer, on-location shoot, art director, poster design

- Directed scenes applying spatial wireframes pre-shoot for character placement within the 360-degree environment; contributed VFX concept direction for split-frame acting and time-freeze sequences.
- Screened at IIT Jodhpur's Immersive Realities VR Film Show to 30+ attendees; collected 15+ written reviews. Made in association with IMXD Lab, IDC IIT Bombay.
- **Tools:** Photoshop

- **LucidPast**
  AI pipeline: 2D archival photos to 3D meshes; conceptual gaze-driven XR. GitHub
  - **Process:** Compared Apple Depth Pro vs. Depth Anything V2 across 10 archival images; selected Depth Pro for superior portrait fidelity; built conceptual interaction framework with 3-act thematic narrowing algorithm
  - **Tools:** Python, Apple Depth Pro, Depth Anything V2, Open3D

Key Courses Taken

- Usability Engineering, Interaction Design and XR, Storytelling and Interactivity, Typography in Digital Media, Appreciation of Gaming, Data Structures, DBMS, Machine Learning, OOP Concepts

Technical Skills

- **UX Methods:** User Research, Heuristic Evaluation (Nielsen), Usability Testing, Wireframing, Storyboarding, User Flows, Information Architecture, Iterative Design, Gestalt Principles, Accessibility Design
- **Design & Prototyping:** Figma, Unreal Engine 5, Unity, Adobe Photoshop, Procreate, DaVinci Resolve, Blender (basic 3D modelling)
- **AI & Computer Vision:** Apple Depth Pro, Depth Anything V2, Google MediaPipe, Open3D, Cursor, Figma Make, Google Antigravity
- **Development:** JavaScript, TypeScript, HTML/CSS/Bootstrap, Angular, ASP.NET (C#), SQL, Python
- **XR Platforms:** Meta Quest (Unity/Unreal Engine 5)

Achievements

- **IQVIA IMPACT Ovation Award** – Amgen, Boehringer Ingelheim, and Takeda SiMS implementations. *2022*

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft MTA: Database Fundamentals
- PCEP – Certified Entry-Level Python Programmer
- Coursera: Introduction to Game Design, Character Design for Video Games
- Coursera: Story and Narrative Development for Video Games, Creative Writing: The Craft of Plot
- Coursera: Getting Started with Python, Python Data Structures

Hobbies

- Narrative-driven media including films, books, and games; visual storytelling and immersive experience design.
