SUMMARY

M.Des. graduate from IIT Jodhpur with 2.5 years of enterprise software experience at IQVIA, owning interaction design and UI/UX decisions on pharma platforms for Amgen, Boehringer Ingelheim, and Takeda with no dedicated designer. Currently a Human-Centred Design Intern at Swiggy Instamart, working on reducing order-to-bag (O2B) fulfilment time in darkstores. Specialises in usability testing, information architecture, interaction design, and AI-assisted workflows; hands-on XR, AR, and VR product design experience.

EXPERIENCE

- **Swiggy Instamart** Jun. 2026 – Present
Human-Centred Design Intern Bengaluru, India
 - Conducting HCD research on darkstore operations to identify friction points in the order-to-bag (O2B) fulfilment workflow; translating field observations and operational constraints into interaction design opportunities to reduce fulfilment time.
- **Immersive.IO** (Early-stage startup) Jun. 2025 – Aug. 2025
Product Development Intern Chennai, India (Remote)
 - Owned end-to-end interaction design and front-end implementation of a stylist-facing annotation tool; independent UI decisions on information architecture, table layout, field placement, and export flow for a permutation-based AI sizing model training pipeline.
 - Built height estimation prototype translating a published facial-proportion algorithm into a working MediaPipe web component.
- **IQVIA** Oct. 2021 – Jan. 2024
Associate Software Developer Kochi, India (Hybrid)
 - Contributed interaction and UI improvements to SiMS, a B2B enterprise pharma platform across Amgen, Boehringer Ingelheim, Sandoz, and Takeda; proactively identified UX gaps and proposed solutions beyond assigned dev tasks across 6 navigational modules and 20+ screens in a team with no dedicated designer; received **IQVIA IMPACT Ovation Award**.
 - During batch-approval workflow development, identified cognitive load from ephemeral toast notifications; proposed a persistent status column, communicated interaction design rationale to BA; approved and shipped within the same sprint.

PROJECTS

- **LiquidRead** / *Next.js, Gemini 2.5 Flash, Figma, Supabase* | *AI Product Design* Jan. – Apr. 2026
 - Designed an adaptive generative UI rendering the same research paper as a structurally different interface per reader expertise (vocabulary, section order, density, visual components); 5 semi-structured interviews, 3 user segments, 4 structural findings.
 - Developed Research-to-Prompt methodology mapping user quotes to traceable AI prompt variables; 26-response survey: 100% of miscalibrated users preferred depth-matched content; 7 custom visual components rendered from Gemini JSON with full behavioural logging to Supabase.
- **Aam** / *Unreal Engine 5, Figma* | *VR Usability Engineering*
 - 3-evaluator Nielsen heuristic evaluation (6 heuristics, severity-rated), accessibility evaluation for colour vision deficiencies, iterative design across 3 versions; Figma prototype rated intuitive (4.0/5) and focused (4.0/5).
- **ARuler Redesign** / *Figma* | *AR Mobile Usability Study, Android*
 - Think-aloud study with 5 users across 3 tasks; 11 issues documented; 11 evidence-based redesign proposals each mapped to a specific user failure across visual hierarchy, iconography, and spatial feedback.
- **Digimal** / *Unity, C#, Figma* | *AR Interaction Design, Meta Quest*
 - Persona, IA, task flows, and state-based interaction model; navigation designed around a fist-close gesture surfacing contextual actions via directional movement; user testing validated a presence-first XR design approach.

TECHNICAL SKILLS

- **UX Skills:** Visual Design, Interaction Design, User Experience Design, Information Architecture, Wireframing, User Flows, Prototyping, Design Systems, User Research, Usability Testing, Heuristic Evaluation (Nielsen), Personas, Stakeholder Presentation, Iterative Design, Accessibility, Gestalt Principles
- **Design & Prototyping:** Figma, Adobe Photoshop, Vibe Coding, Procreate, DaVinci Resolve, Unreal Engine 5, Unity, Blender (basic)
- **AI-Assisted Design:** Figma Make, Cursor, ChatGPT, Claude, Google Antigravity (live), AI image generation & prompt engineering
- **Development & Tools:** JavaScript, TypeScript, HTML/CSS, Bootstrap, Angular, ASP.NET (C#), SQL, Python, Next.js, Google MediaPipe, Supabase; Jira, GitHub, TFS

EDUCATION

- **Indian Institute of Technology, Jodhpur** 2024 – 2026
Master of Design (M.Des.), CGPA: 8.02 Jodhpur, India
- **Mar Athanasius College of Engineering, Kothamangalam** 2017 – 2021
Bachelor of Technology, Computer Science & Engineering, CGPA: 8.14 Kerala, India

ACHIEVEMENTS

- **IQVIA IMPACT Ovation Award:** Technical excellence and deployment ownership across SiMS for Amgen, Boehringer Ingelheim, and Takeda. 2022
- **NID DAT Mains 2024:** Graphic Design, All India Rank 27. 2024
